

01 / WARRANTY

Concretta Micro Concrete

Warranty Certificate

WARRANTY COVERAGE

Concretta Micro Concrete is warranted for 2 years from the date of purchase, provided that the specified application rules and complete system requirements are followed.

01

CRACKING WARRANTY

Concretta Micro Concrete is designed to remain crack-free under normal service conditions. If cracking occurs, the underlying substrate and structural movement should be inspected, as these can transfer through the coating.

02

ADHESION WARRANTY

When correctly prepared and applied as a complete system, Concretta is warranted against peeling or flaking caused by product adhesion failure.

03

COLOR WARRANTY

For interior applications, the system is warranted against significant abnormal fading or color change under normal conditions. For exterior applications, atmospheric exposure can affect intense or bright colors over time; such colors are not recommended where long-term exterior color stability is critical.

04

APPLICATION WARRANTY

For projects applied directly by our company, responsibility for application-related workmanship issues belongs to our company within the applicable warranty conditions.

WARRANTY EXCLUSIONS

This warranty does not cover structural movement or settlement, capillary moisture, impact, flooding, damage caused by furniture, misuse, substrate failure, or scratches and cracks resulting from external causes.

Warranty period: up to 2 years with proof of purchase. www.concretta.com
